KNOWESIS CBRNE EXPERTISE: PROTECTING THE NATION

Fairfax, VA (July 2021)

The Nation continues to face a growing risk posed by chemical, biological, radiological, nuclear, and high-yield explosives (CBRNE) agents and effects. CBRNE agents threaten to cause massive destruction, disruption of operations, and large-scale loss of life across a range of plausible scenarios, at home and abroad.

Knowesis, Inc. (Knowesis) provides the Federal Government with subject matter expertise to better assess, mitigate, and respond to these risks by helping to develop policies, execute programs, and recommend solutions to address the challenges posed by CBRNE.

With years of experience providing such support to the Department of Defense (DoD), Knowesis experts are helping to protect the health of our military Servicemembers, preserving the operational capabilities of the force, and contributing to the success of the mission.

Knowesis supports clients in continued engagement across Federal agencies and helps shape policies and procedures to best respond to emerging crises ranging from threats from CBRNE-armed adversaries to emerging diseases such as Ebola and coronavirus disease 2019 (COVID-19).

Results from Knowesis support efforts include continued client satisfaction and trust, built by helping the Federal Government address challenging CBRNE issues that have and will continue to threaten national security. Success is demonstrated through the real-world impacts, from long-term engagement to medical countermeasures against a range of CBRNE agents, and policies and guidance to support continued protection of DoD personnel and the Nation.

###

Knowesis is a Center for Veterans Enterprise (CVE) certified Service-Disabled Veteran Owned Small Business (SDVOSB), 8(a) Economically Disadvantaged Woman Owned Small Business (EDWOSB), providing a full range of professional consulting services to federal and state government agencies to include: Computational Sciences, Information Management and Technology, Operations and Management, Policy and Program Evaluation, Scientific and Medical Research, and Communications.
